

## Acclipse ForecastIT — Download and Apply Update

When a new version of Acclipse ForecastIT is released, the first user who opens Acclipse ForecastIT for the day will be prompted to download the update. If they proceed with the download by clicking *Next* on the update wizard, the updated files will be downloaded to your server and each workstation will be prompted to apply the update.

*NOTE: You can check for updates manually at any time by selecting **Help** → **Check for Updates**.*

Downloading an updated version of Acclipse ForecastIT

Once the update has been downloaded you might get a message asking you to close any applications that are still open on your computer. Once you have closed the listed applications, click **Retry**.

*TIP: To close any Acclipse applications that might still be running, right-click the relevant icon on the system tray → Select **Exit**.*
